

WBS Activity / Work Package	Project Management	Requirements & Design	Development Team	QA Team	Deployment Team
Establish Project Timeline and Schedule	R/P				
Allocate Resources to Project Tasks	R/P				
Track Actual vs. Planned Expenditure	R/P				
Establish Communication Channels	R/P				
Prioritize Requirements		R/P			
Design System Integration Approach		R/P			
Define Visual Style Guide		R/P			
Set Up Backend Framework			R/P		
Design Database Schema			R/P		
Integrate Backend Registration Endpoint			R/P		
Test User Registration Workflow			P	R	
Implement Activity Input Interface			R/P		
Implement Calorie Calculation Engine Backend & Frontend			R/P		
Implement Meal Input Interface			R/P		
Define Testing Scope and Objectives				R/P	
Execute Functional Tests				R/P	
Set Up UAT Testing Environment				R/P	
Deploy Application to Target Environment					R/P
Implement Alerting Mechanisms					R/P
Prepare Final Project Report	R/P
